## What happens after stainless steel reaches its end of life?

Can you recycle stainless steel?

Yes... In fact, it's one of the major benefits of stainless steel aside from its physical properties.

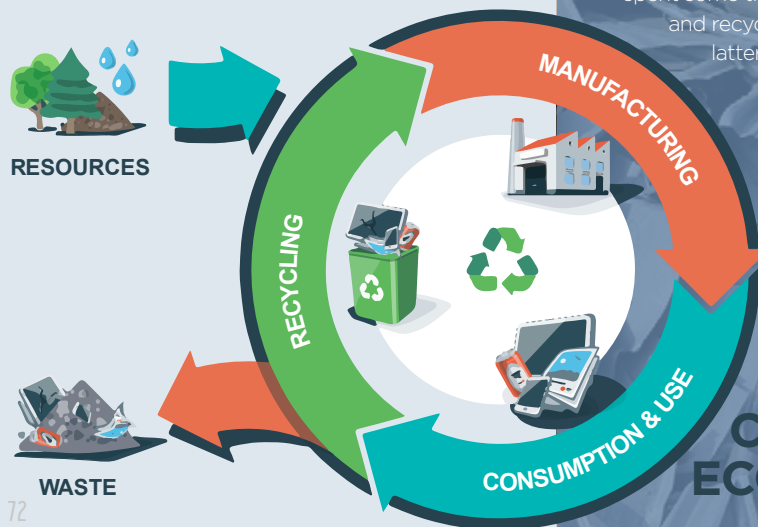

## Using recyclable materials isn't just eco-friendly, it's cost-effective.

### Is recycled stainless steel good enough?

For starters, stainless steel is the top recycled metal in the world, and by far.

This means any manufacturer that makes stainless steel with recycled materials has spent some time learning how to use the new and recycled steel – or maybe even the latter alone.

Such experience, coupled with technological advancements, makes it possible to turn old scrap into manufacturing materials that are as durable, quality, and high strength as the original material.

## The Components of Milk Cartons.

Milk Cartons are made up of a number of components which are layered:

- Paperboard (made from wood)
- Polyethylene (a type of plastic)
- Aluminum.

These all give Milk Cartons their unique properties

1000 milk cartons can instead of a tree

## Milk Cartons are Recyclable!

When recycled, Milk Cartons can go on to be transformed into new paper products as well as eco-friendly materials rather than end up in a landfill.
